MANAGING DIRECTOR MESSAGE

Through the years we have taken on many projects which we have delivered with satisfaction, and we have built a reputation for being reliable with both contractors and owners. This is important because in today's business world you always need reliable partners that will help you meet your deadlines and goals, while providing fast solutions in a time where construction happens at a fast rate. Our team believes that we should do business while considering the following: respect, trust and hard work, because with these three principle guidelines we can achieve our goals and overcome any obstacle that comes our way.

Mr. Ali Dawoud

GRANITE

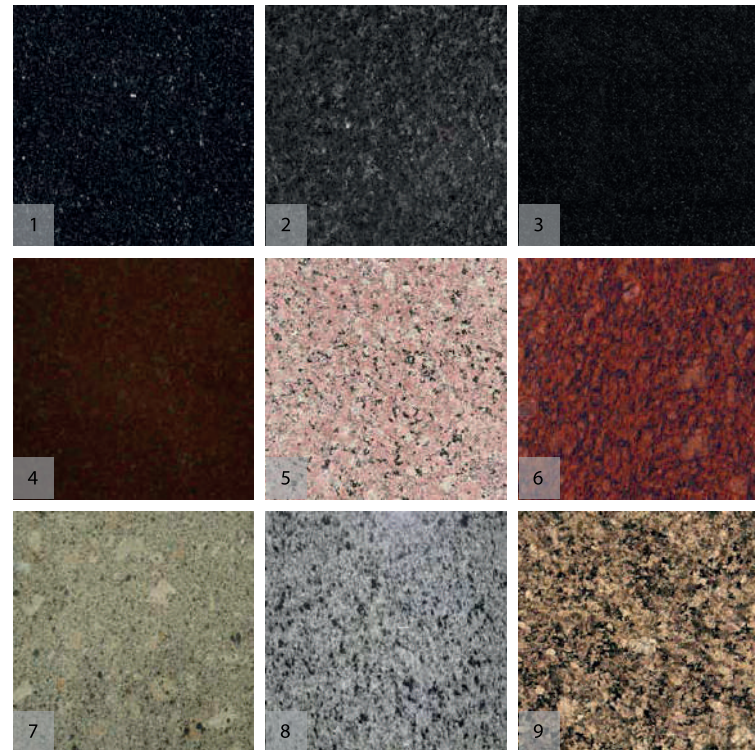

Granite is the rock most often quarried as a "dimension stone" (a natural rock material that has been cut into blocks or slabs of specific length, width and thickness).

Granite is hard enough to resist most abrasion, strong enough to bear significant weight, inert enough to resist weathering and it accepts a brilliant polish. These characteristics make it a very desirable and useful dimension stone. We can cater to special orders which require cut-to-size pieces of granite.
